

Helmo guard

Comprehensive Chatbot Training FAQ

1. Product Basics & Everyday Riding

Q: What exactly is Helmo guard and how is it different from a regular helmet?

A: A regular helmet only protects against impact, while Helmo guard is an intelligent safety device that actively detects accidents, tracks your ride, and automatically calls for emergency help when you need it most.

Q: Do I have to buy a new helmet, or can I attach it to my current one?

A: The Helmo guard device is removable and transferable. If you change or damage your helmet, you can simply detach the unit and install it on another compatible helmet.

Q: How long does the battery last on a single charge?

A: Under optimized usage, the battery is designed to provide 5 to 7 days of standby time so you do not have to worry about charging it every single day.

2. Emergency Response & Safety

Q: What happens if I get into an accident?

A: The device instantly detects the crash, shares your live GPS location, and triggers emergency alerts to your emergency contacts and medical response teams to get help within the critical "Golden Hour".

Q: What if I just drop my helmet or hit a pothole—will it trigger a false alarm?

A: No. Helmo guard uses multiple sensors and smart algorithms specifically tuned to distinguish between normal road bumps or accidental drops and genuine crashes, keeping false alerts to a minimum.

Q: Can I cancel an alert if I am uninjured after a minor slip?

A: Yes, you receive a prompt to cancel the alert directly via the mobile app before emergency notifications are dispatched.

3. App, Subscriptions & Privacy

Q: Do I need a paid subscription for the safety alerts to work?

A: The core emergency detection and notification features work out of the box with the basic free app. A premium subscription adds advanced tools such as family live tracking, continuous cloud backup, ride history reports, and theft tracking.

Q: Is my location and personal travel data kept private?

A: Yes. Your data belongs to you, is protected by strong encryption, and is only accessed or shared with emergency services based on your explicit consent.

4. App Dependency & Connectivity

Q: Do I need to keep the app open on my phone for the SOS feature to work?

A: No, the core emergency hardware functions work independently. While the app enhances your premium experience, you are still protected even if the app is uninstalled or closed.

Q: What exactly do I get if I upgrade to the premium version of the app?

A: The premium subscription unlocks advanced features designed for ultimate safety and convenience, including live tracking, theft tracking, family alerts, AI ride reports, and cloud backup.

5. Compatibility & Usage

Q: Can I use Helmo guard while riding my bicycle, or is it only for motorcycles?

A: We are starting with motorcycles, but we plan to expand the technology for cycling, adventure sports, and industrial safety in the future.

Q: If I go on a road trip outside India, will the emergency alerts still work?

A: Initially, our emergency response network and services are designed for riders in India. After our success here, we plan to expand internationally to areas like Asia, the Middle East, and Europe.

6. Peace of Mind & Family Safety

Q: How does Helmo guard help my family when I am riding on highways or late at night?

A: Helmo guard is built to give your family complete peace of mind. Through the app, they can receive instant family alerts and track your live location if you choose to share it.

Q: Why should I buy this instead of a high-end regular helmet?

A: A regular helmet only offers physical protection, whereas Helmo guard provides physical protection along with intelligent assistance. It acts as a safety ecosystem that actively works to get you help before, during, and after an accident.
